Getting Started

Charge the Arc by gently pulling back micro USB charge port cover, connect and charge using cable supplied. The Arc can also be charged using a mains USB charger at **5V 1.0A MAX**. 'Mode key' indicator will display solid 'green light' once fully charged.

* Please refer to 'Mode key functions' for more details.

Mounting the light

Securely mount the light to handlebar using the strap. Fold any excess back onto the hook.

Operating the light

- Double click Mode Key to switch on.
- Click once to cycle through modes.

- Max
- Eco
- Flash
- Strobe

- Click and hold Mode Key for 2 seconds to switch off.

⚠ Never look directly into the light!

Mode Key Functions

IZONE Arc is a highly sophisticated light with multiple modes, functions, protection and charge circuits. The 'Mode key' / Indicator accesses all features and displays real-time battery status.

5. Waterproof, IPX4
6. Patented air cooling ports
7. Low profile, tool free bracket
8. Bright side visibility
9. High capacity Li-ion power cell

Warranty

IZONE LED lighting products carry a two (2) year warranty from the original date of purchase to the original owner (proof of purchase is required). This warranty covers materials and manufacturing defects on LED, electronics, housing and hardware. IZONE RECHARGEABLE batteries carry a six (6) month warranty against manufacturing defect. Normal wear and tear, improper installation, modification, damage or failure due to accident, misuse, abuse and neglect are not covered under the warranty. All warranty claims must be processed through the original point of purchase.

Warnings

Never modify the light or electronic circuit.
Please be sure to attach the light to the handlebar securely before riding.
Please do not mount the light where it may interfere with controls.
Never look directly into the light when switching on.
When used for cycling, this light should be used in conjunction with a British Standard 6102/3 cycle light.
